

# What is a Reimbursable Meal?

The National School Lunch and School Breakfast Program are regulated by the United States Department of Agriculture. A complete meal, meeting nutrient content and portion size requirements, allows a school to receive benefits (money and USDA foods) and is referred to as a “a reimbursable meal.” School meals offer parents a convenient way to provide nutritious meals for their children at the lowest possible price.

## The following are school meal components:

- Milk (fat-free or 1%, flavored milk or unflavored)
- Meat/meat alternate
- Bread/grains
- Fruit\*
- Vegetables\*

## MAKE A MEAL

\*Students are required to take 1/2 cup of a fruit or vegetable to make a meal at breakfast and lunch.

The most nutritious meals contain all of the components, however students have the option to decline items they do not want to eat, which is referred to as “Offer vs. Serve.” If students feel they don’t get enough to eat, make sure they understand they can take all components and the choices that are available to them. School nutrition staff are trained to help students build a reimbursable, balanced meal!

## Age Groupings

There are different requirements for different age groups for certain components as outlined in the chart below. Each component and vegetable sub-group provides different nutrients students need for a healthy diet.
