

DISTRICT EMERGENCY OPERATIONS PLANS

The safety and security of the school community is paramount to Bondurant-Farrar Community School District. While there is no absolute guarantee of safety, it is the goal of the district to encourage and support a physically secure learning and working environment within its buildings. The district will work in conjunction with community stakeholders including local emergency management coordinators and local law enforcement agencies to create emergency operations plans for all district buildings and school buildings where students are educated.

The superintendent or designee will be responsible for the development, review and implementation of the district emergency operations plan. The plan will include procedures for transmitting alerts regarding emergency situations to school personnel, students, and employers for non-school employees whose presence is regularly required in the school building. The emergency operations plan will be updated and reviewed annually by the board and will address responses to natural disasters, active shooter scenarios and other emergencies as determined by the district. The emergency operations plans are confidential and will not be subject to disclosure under Iowa Code Chapter 22. However, the district will publish procedures for students, school personnel, parents, and family members to report possible safety threats on school grounds and at school activities.

The administration will hold annual emergency operations drills at each district building covered by an emergency operation plan in accordance with law. The district will determine which school personnel will participate and whether local law enforcement and students participate in annual drills.
